Targus

APS03US1 | Targus Travel Power Outlets with Surge Protection

The Targus Travel Power Outlets with Surge Protection is a portable power strip that provides 4 outlets. Perfect for travel, the power strip makes it possible to plug in several devices when only one outlet may be available in a hotel room or airport. The Targus Power Outlet is the only travel size power strip currently available that features surge protection to help keep electronics protected from unexpected surges and spikes. The outlets are also designed to accommodate larger plug sizes to optimize the usage of each outlet. With its compact design, the power outlets can easily fit into a laptop case or luggage for added convenience. The Targus Travel Power Outlets are ideal for traveling professionals, students, or any individual requiring additional power outlets to safely power or charge electrical devices.
